**TOPIC**

Health-care professionals, patients, families, community leaders, and policy makers all struggle to understand the interactions between health and behaviour, and how to use that knowledge to improve the health status of individuals and populations. Health and behaviour are related in myriad ways, yet those interactions are neither simple nor straightforward.

We welcome fellow academics, stakeholders, patients, health professionals and policy makers for a full day of presentations about cutting-edge research on health and behaviour.

**PROGRAMME**

10:00 - 11:00
REGISTRATION AND COFFEE

11:00 - 12:30
